JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

GUATEMALA.

Report from Livingston—Fruit port.

LIVINGSTON, GUATEMALA, June 19, 1900.

SIR: I have the honor hereby to submit my report for the week ended June 19:

The health of this port is excellent; not even the usual malarial fevers for this period of the year being extant. One whole household, however, has become infected with the "dermatobia" (Osler), which gives rise to a painful and indolent abscess accompanied with fever. No passengers or news from San Salvador. Inspected the following ship: June 19, steamship *Stillwater*; cargo, general merchandise; number of crew, 32; number of passengers, 11. All in good sanitary condition. Certificate inclosed.

Respectfully,

SAMUEL HARRIS BACKUS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HONDURAS.

Report from Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, June 21, 1900.

SIR: I have the honor to submit report for week ended June 21, 1900, with a list of vessels inspected and cleared during the week.

The health and sanitary conditions of the port and adjacent country continue good. No deaths during week. Only a few cases of malarial fever in the port.

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine Hospital Service.

[Inclosure.]

List of vessels inspected and cleared during the week ended Thursday, June 21, 1900.

Date.	Vessel.	Master.	Crew.	Destination.	Number of passengers.	Number of pieces of baggage disinfected.
